

Mathews Memorial Library
WiFi TO GO QUICK START GUIDE

Turn On/Off

Press and hold the power button about 5 seconds to turn on. You will see a splash screen and then some information on the touch screen as shown above. The screen will turn off after 30 seconds. A standby indicator light will flash every few seconds to show that the MiFi is operational. Press the power button quickly to turn the screen back on. To turn off the MiFi, press and hold the power button until you see a menu. Choose Shut Down and press OK.

Charge

Notice the power level indicator and charge if below 25%. To charge, insert the small end of the USB cable into the USB charging port. Insert the large end into the power

block and plug in a wall outlet. It may take several hours to fully charge and you can use the MiFi while charging. **DO NOT LEAVE PLUGGED IN CONTINUOUSLY.**

Connect External Antenna

Notice the 4G LTE signal strength indicator. If it is 3 bars or less, connect the antenna's 2 cables to the antenna ports on the MiFi by gently inserting both antenna cable adapters. Try different spots around your location to find the best signal. The antenna has a magnetic base and can be placed securely on a metal surface if available.

Connect to WiFi

On your personal device, access the Wi-Fi settings and choose **MML-MIFI-XX** (XX will be a 2-digit number corresponding to the MiFi unit) from the list of available networks. Enter password ***broadband4u*** when requested. You should now be connected. You will hear an audible alert and see a message on the MiFi when connected. You are now ready to enjoy high speed Internet!

Return

Please charge the MiFi before you return it to the library's Adult Circulation Desk. **DO NOT RETURN TO AN OUTDOOR LIBRARY BOOK DROP.**

Need Help?

You may call the library at (804)725-5747 or email staff@mathewslibrary.org for assistance or to schedule a time to come in for a demonstration. Do not attempt to repair a non-working Wi-Fi Hotspot on your own.
